DETAILED ACTION

Response to Amendment

1. The amendment and remarks filed December 2, 2008, are noted with appreciation.
2. Claims 1, 4-8, and 14-18, are now pending.

Response to Arguments

3. Applicant's arguments filed December 2, 2008, have been fully considered but they are not persuasive. The Examiner's responses are the same as set forth in the prior Office action and are incorporated herein again by reference.

Claim Rejections - 35 USC § 103

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
5. Claims 1, 4-8, and 14-18, are rejected under 35 U.S.C. 103(a) as being unpatentable over Wu et al. (US 6,624,269 B2) in view of JP 2904593 B2.

A. These claims are rejected for the same reasons as set forth under this heading in the prior Office action.

B. With respect to the claims as amended:

- i. Claims 1 and 18

Since the cited combination of references teaches the claimed composition and process, it is the Examiner's position that the composition necessarily possesses the claimed peel strength, absent evidence to the contrary.

ii. Claim 14

The claimed range remains encompassed by the range of 0.1-30 wt.-% disclosed by JP '593.

iii. Claims 15 and 16

As noted in connection with claims 4 and 6, JP '593 teaches that the metal powder may be zinc or copper [0016]. It would have been obvious to one skilled in the art to further modify Wu so as to use these metal powders as such are disclosed by JP '593 as suitable and functional for suppression of bubbling.

iv. Claim 17

As noted in prior Office actions, none of the cited references expressly teaches that the composition is stabilized.
